

I am greatly concerned with the FCC ruling to move ahead with BPL, against the word of several important Public Safety and Technology organizations.

The HF and VHF spectrums REQUIRE spectral purity in order to facilitate intra and inter state communications, especially in the event of a national emergency.

In support of Homeland Security, I ask that you reconsider your thoughts regarding BPL. This dangerous initiative WILL cause interference to Civilian, Aircraft, Military and Civil Defense radio services.

Thank you for your consideration.
